

The Console Object

[< Previous](#)[Next >](#)

Console Object

The Console object provides access to the browser's debugging console.

Console Object Methods

Method	Description
<u>assert()</u>	Writes an error message to the console if the assertion is false
<u>clear()</u>	Clears the console
<u>count()</u>	Logs the number of times that this particular call to count() has been called
<u>error()</u>	Outputs an error message to the console
<u>group()</u>	Creates a new inline group in the console. This indents following console messages by an additional level, until console.groupEnd() is called
<u>groupCollapsed()</u>	Creates a new inline group in the console. However, the new group is created collapsed. The user will need to use the disclosure button to expand it
