

The Location Object

[< Previous](#)[Next >](#)

Location Object

The location object contains information about the current URL.

The location object is part of the window object and is accessed through the window.location property.

Note: There is no public standard that applies to the location object, but all major browsers support it.

Location Object Properties

Property	Description
<u>hash</u>	Sets or returns the anchor part (#) of a URL
<u>host</u>	Sets or returns the hostname and port number of a URL
